ENGLISH

This section contains 22 questions.
The time allotted is 20 minutes.

The following section contains three types of questions: Sentence Completion, Restatement and Reading Comprehension. Each question is followed by four possible responses. Choose the response **which best answers the question** and mark its number in the appropriate place on the answer sheet.

Sentence Completions (Questions 1-8)
This part consists of sentences with a word or words missing in each. For each question, choose the answer **which best completes the sentence**.

1. Travelers entering New Zealand are prohibited ____ fresh fruits and vegetables.

(1) from bringing in
(2) having brought
(3) only when bringing
(4) if ever brought

---

2. Conservative ____ Nicolas Sarkozy defeated socialist Ségolène Royal in the 2007 French presidential election.

(1) solution
(2) candidate
(3) spectacle
(4) compromise

---

3. Johnny Weissmuller, who starred in many Tarzan movies, began acting after ____ from a career in competitive swimming.

(1) rewarding
(2) retiring
(3) restricting
(4) relieving

---

4. The ancient Greek statesman Demosthenes was an outspoken ____ of freedom of expression.

(1) stranger
(2) neighbor
(3) performer
(4) defender

אין להעתיק או להפיץ בחינה זו או קטעים ממנה בכל צורה ובכל אמצעי, או ללמדה – כולה או חלקים ממנה – בלא אישור בכתב מהמרכז הארצי לבחינות ולהערכה.

5. Irritable bowel syndrome shares symptoms with many other digestive disorders; _____, it can be difficult to diagnose.

(1) previously
(2) fortunately
(3) scarcely
(4) consequently

---

6. Saxophonist Ornette Coleman had such an ____ approach to harmony that it was many years before mainstream musicians came to appreciate his style.

(1) unorthodox
(2) incessant
(3) adhesive
(4) equivalent

---

7. Margaret Bourke-White was one of the first female war ____ to report on the fighting in Europe during World War II.

(1) commuters
(2) collaborators
(3) constituents
(4) correspondents

---

8. In 2019, fire ____ Paris's renowned Notre Dame Cathedral, causing the building's spire and roof to collapse.

(1) dismayed
(2) engulfed
(3) disgraced
(4) enchanted

Restatements (Questions 9-12)
This part consists of several sentences, each followed by four possible ways of restating the main idea of that sentence in different words. For each question, choose the one restatement **which best expresses the meaning of the original sentence**.

9. The codex, the earliest manifestation of the modern book, gained prevalence between the third and eighth centuries C.E.

(1) Sometime between the third and eighth centuries C.E., the codex evolved into the book as it is known today.
(2) The first form of the modern book was the codex, which came into widespread use between the third and eighth centuries C.E.
(3) The codex, the main type of text from the third to the eighth centuries C.E., fell out of use after the modern book emerged.
(4) Two types of documents widely used between the third and eighth centuries C.E. were the codex and the book.

---

10. It has been found that when a speech is broken up by disfluencies – sounds such as "um" and "ah" – the audience is apt to recall more of what was said.

(1) Speakers often say "um" and "ah" when they have forgotten what they were planning to say.
(2) People are likely to remember a speech better if the speaker sometimes says "um" and "ah" between words.
(3) An audience listening to a speech containing a lot of "um"s and "ah"s is likely to lose interest quickly.
(4) By saying "um" and "ah", a speaker allows the audience to think about what was said.

---

11. Pizza recipes were excluded from late 19th-century Italian cookbooks out of disdain for a dish associated with the working class.

(1) Once eaten mainly by working-class Italians, pizza became more popular after it was included in several late 19th-century cookbooks.
(2) Although pizza was originally a simple dish prepared by busy, working-class Italians, more complicated variations of it were introduced in some late 19th-century cookbooks.
(3) Pizza, a dish eaten mostly by the working class, was considered unworthy of being included in Italian cookbooks of the late 19th century.
(4) Pizza, a food long popular with the working class, did not appear in Italian cookbooks until the late 19th century.

---

12. Few West European countries can claim France's linguistic diversity.

(1) Unlike some other West European countries, France has worked hard to preserve its linguistic traditions.
(2) French is the second language of many West European countries.
(3) French has been deeply influenced by the languages of other West European countries.
(4) More languages are spoken in France than in most other West European countries.

Reading Comprehension

This part consists of two passages, each followed by several related questions. For each question, **choose the most appropriate answer based on the text**.

Text I (Questions 13-17)

(1) Abu'l Qasim Mansur (c. 935-1026), more commonly known by his pen name, Firdousi, was a medieval Persian poet of great eminence. He is best known for his *Shahnameh* (Book of Kings), a lengthy epic poem that recounts the history and legends of Persia. Firdousi, who spent 35 years working on the poem, based his work on an (5) earlier collection of Persian stories and historical records. For over a thousand years, Persians have read and listened to recitations from this literary masterpiece.

There are many different accounts about the events preceding and following the production of the *Shahnameh*. According to one, Sultan Mahmud had promised to give Firdousi one gold coin for each verse of the *Shahnameh*, to be paid upon its completion. (10) The poem ended up being 60,000 verses long. The Sultan's advisors pointed out that the payment would be enormous and convinced him to pay Firdousi in silver coins rather than gold. When Firdousi heard this, he was outraged and refused to accept the money. Ten years later – as the story goes – the Sultan read a beautiful line of poetry written by Firdousi and deeply regretted his unfair treatment of the poet. He sent (15) messengers to deliver the 60,000 gold coins, along with a letter of apology and a special robe as a sign of respect. However, the caravan carrying the treasure arrived in Firdousi's village just as the poet's funeral procession was passing through the streets.

The Sultan's messengers offered the money to Firdousi's daughter, but she turned it down. Firdousi's sister, however, remembered that the poet had often discussed the (20) need to build a stone wall along the river to protect the village from flooding. She used part of the gold for this and, to commemorate her brother, used the rest to build a caravanserai – a guesthouse for travelers.

Questions

13. The main purpose of the second paragraph is to -

(1) explain why the Sultan was disappointed with Firdousi's *Shahnameh*
(2) discuss the historical events described in the *Shahnameh*
(3) compare several versions of the *Shahnameh*
(4) present one story about the *Shahnameh*

אין להעתיק או להפיץ בחינה זו או קטעים ממנה בכל צורה ובכל אמצעי, או ללמדה – כולה או חלקים ממנה – בלא אישור בכתב מהמרכז הארצי לבחינות ולהערכה.

14. The advisors mentioned in the second paragraph recommended giving Firdousi -

(1) less than what the Sultan had promised
(2) a robe
(3) nothing
(4) a gold coin for every verse he wrote

---

15. According to the second paragraph, Sultan Mahmud -

(1) was invited to Firdousi's funeral
(2) requested that Firdousi write another poem
(3) did not do as his advisors suggested
(4) realized he had behaved badly towards Firdousi

---

16. The main purpose of the last paragraph is to -

(1) explain why Firdousi's daughter turned down the gold coins
(2) discuss how the Sultan's money was used
(3) describe the wall built in Firdousi's memory
(4) describe the caravanserai built at the Sultan's request

---

17. According to the text, Firdousi was <u>not</u> -

(1) a respected poet
(2) an advisor to the Sultan
(3) familiar with Persian legends
(4) interested in protecting his village

Text II (Questions 18-22)

(1) Crystals are found in many of the substances in the world around us – including the minerals that make up rocks, compounds found in plants, and metals. Scientists have long known that the molecules that make up crystalline substances are arranged in a precise, three-dimensional geometric pattern that repeats itself. However, an exact (5) map of a crystal's structure can be drawn only by using a technique called x-ray diffraction crystallography.

When a beam of x-rays strikes a crystal, the crystal scatters the beam in many different directions and with different intensities. By capturing a photographic image of these scattered x-rays, one obtains a "diffraction pattern" that can be used in deciphering (10) the molecular configuration of the crystal. Though no easy task, accurately determining the crystal's structure is crucial to understanding its properties and behavior. Such information can be extremely useful in many fields – for example, medicine.

A case in point is the research on insulin that was conducted by British scientist Dorothy Crowfoot Hodgkin. Insulin is a hormone that regulates the body's processing (15) of sugars and fats. Inadequate production or improper utilization of insulin results in diabetes, a serious disease. In 1934, Hodgkin set out to ascertain the hormone's molecular structure by using x-ray diffraction crystallography on samples of crystallized insulin. At that time, x-ray diffraction crystallography was not sufficiently developed to cope with the complexity of the insulin molecule, which consists of over 400 atoms. (20) Over the years, Hodgkin, together with other researchers, radically improved x-ray diffraction crystallography. She was awarded the Nobel Prize in Chemistry in 1964 for her work. In 1969, after 35 years, she finally succeeded in resolving the molecular structure of insulin.

Questions

18. The main purpose of the text is to -

(1) describe crystals and their molecular structure
(2) discuss an important scientific research method
(3) present a recent discovery in the field of medicine
(4) discuss Hodgkin's contribution to x-ray diffraction crystallography

© כל הזכויות שמורות למרכז ארצי לבחינות ולהערכה (ע"ר)
אין להעתיק או להפיץ בחינה זו או קטעים ממנה בכל צורה ובכל אמצעי, או ללמדה – כולה או חלקים ממנה – בלא אישור בכתב מהמרכז הארצי לבחינות ולהערכה.

19. It can be inferred from the second paragraph that all crystals -

(1) change when struck by a beam of x-rays
(2) produce a diffraction pattern
(3) have medical uses
(4) have the same molecular configuration

---

20. It can be inferred from the second paragraph that "diffract" is closest in meaning to -

(1) strike
(2) scatter
(3) decipher
(4) configure

---

21. According to the last paragraph, in 1934 -

(1) the cause of diabetes was not yet known
(2) x-ray diffraction crystallography was not very advanced
(3) insulin had just been discovered
(4) Hodgkin began working with other scientists on x-ray diffraction crystallography

---

22. It can be inferred from the text that it took Hodgkin 35 years to ascertain the molecular structure of insulin because -

(1) insulin is not actually a crystal
(2) making an exact map of a complex crystal is very difficult
(3) not all crystals can be analyzed using x-ray diffraction crystallography
(4) the structure of insulin is very similar to that of other molecules

---
